

# Consumer Confidence Report (CCR) Certification Form

Water System Name: TOWN OT SWANSEA				
Water System No.: SC 3 2 1 0 0 0 6 Report Year: 2022 Population Served: 726				
The Community Water System (CWS) named above hereby confirms that all provisions under <b>R.61-58.12</b> requiring the development of, distribution of, and notification of a consumer confidence report have been executed. Further, the CWS certifies the information contained in the report is correct and consistent with the compliance monitoring data. In addition, if this report is being used to meet Tier 3 Public Notification requirements, as denoted by the checked box below, the CWS certifies that public notification has been provided to its consumers in accordance with the requirements of R.61-58.6.E(4).				
Certified by: Name: Christie Weidenhof Title: Env. Systems Operator				
Signature:				
Delivery Achieved Date: June 17, 2023 Date Reported to State: June 28, 2023				
The CCR includes the mandated Public Notice for a monitoring or Tier 3 violation (check box, if yes)				
Check all methods used for distribution (see instructions for delivery requirements and methods):  ☐ Paper copy to all ☐ US Mail ☐ Hand Delivery ☐ Notification of Availability of Paper Copy (other than in the CCR itself)				
Notification Method (i.e. US Mail, door hanger)				
Notification of CCR URL Direct URL address:				
Notification Method (i.e. on bill, bill stuffer, separate mailing, email)  ☐ Direct email delivery of CCR (attached?☐ or embedded? ☐)				
Notification Method (i.e. on bill, bill stuffer, separate mailing)				
Newspaper (attach PDF copy) What Paper? The Times and Democrat Date Published: June 17, 2023				
Notification Method (i.e. US Mail, on bill, bill stuffer, door hanger, a postcard dedicated to the CCR, or email)				
<ul> <li>"Good faith" efforts (in addition to the above required methods) were used to reach non-bill paying consumers such as industry employees, apartment tenants, etc. Extra efforts included the following methods:</li> <li>posting the CCR on the Internet at URL:</li> </ul>				
mailing the CCR to postal patrons within the service area				
advertising the availability of the CCR in news media (attach copy of announcement)				
<ul> <li>□ publication of the CCR in local newspaper (attach copy)</li> <li>☑ posting the CCR in public places such as: (attach list if needed) Town of Swansea Town Hall</li> </ul>				
delivery of multiple copies to single bill addresses serving several persons such as: apartments, businesses, and large private employers				
delivery to community organizations such as: (attach list if needed)				
<u>Note</u> : Use of social media (e.g., Twitter or Facebook) or automated phone calls DO NOT meet existing CCR distribution methods under the Rule.				
SUBMIT FORM 3999 AND PDF ATTACHMENTS TO: CCR@dhec.sc.gov, Subject Line shall include your 7-digit permit number and your Water System Name. Optional Submission to DHEC via Fax at 803-898-3795 or mail to ATTN: CCR RULE MANAGER, Bureau of Water, 2600 Bull Street, Columbia, SC, 29201.

#### 2022 Water Quality Report Town of Swansea System # 3210006

The Town of Swansea is pleased to provide you with this year's Water Quality Report. We want to keep you informed about the water and services we have delivered to you over the past year. Our goal is to provide you a safe and dependable supply of drinking water. We are committed to ensuring the quality of your water. Our water is purchased from Lexington Joint Municipal Water and Sewer Commission.

A Source Water Assessment Plan has been prepared for our system. If you have any questions about this report or concerning your water utility, please contact Mayor Viola McDaniel at (803) 568-2835. We want you, our neighbors, and valued customers, to be informed about your water utility. Feel free to attend any of our regularly scheduled meetings on the 3rd Monday of every month at 6:00 pm at the Town Hall. This report explains our water quality and what it means. The Town of Swansea routinely monitors the system for constituents in your drinking water according to Federal and State laws. As water travels over the land or underground, it can pick up substances or contaminants such as microbes and chemicals. All drinking water, including some bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It is important to remember that the presence of these constituents does not necessarily pose a health risk.

that the presence of these constituents does not necessarily pose a health risk.

The table shows the results of our monitoring for the period of January 1st to December 31st, 2022. In this table you will find the following terms and abbreviations:

Action Level (AL) – the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow. Parts per million (ppm) or Milligrams per litter (mgn) – one part per million corresponds to one minute in two years or a single penny in \$10,000. Parts per billion (ppb) or Micrograms per litter – one part per million corresponds to one minute in 2,000 years or a single penny in \$10,000,000. Maximum Contaminant Level – The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink two (2) liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

Maximum Contaminant Level Goal - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Maximum Residual Disinfectant Level (MRDLG) – The highest level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Non-Detects (ND) – Laboratory analysis indicates that the constituent is not present Picocurles per liter (pCi/L) – Picocuries per liter is a measure of the radioactivity in water.

The full 2022 Water Quality Report is available on our website <u>TownofSwansea.SC.gov</u>.
